

# Orhan AYDOĞDU

## Full Stack Developer

Full Stack Developer passionate about optimizing slow and complex systems, with a strong focus on performance, security, data integrity, and scalable architecture.

PHP, Node.JS, MySQL, MongoDB, PostgreSQL, Redis, Javascript, React.JS / React Native, HTML HaProxy, Nginx, Kubernetes, Docker, Jenkins, Git

## Professional Summary

- Passionate full-stack developer with solid experience in backend systems, scalable architecture, and data optimization. Although I started my academic journey in Archaeology, I've always been drawn to software development and technology since high school. In my fourth year, I left university to fully focus on my software career.
- Since then, I've worked with companies like Kentkart, Bisu, and Gomeed, led development teams, contributed to open-source projects, and built production-level systems using Node.js, MongoDB, Redis, and PostgreSQL. I continue to grow through hands-on experience and lifelong learning.
- In my current projects, I actively use AI coding tools such as Claude CLI, Antigravity, and Codex to go beyond standard coding workflows and significantly improve development speed, code quality, and overall productivity.

## Education

- **Usak University – Computer Programing**
  - 2025 – (Incomplete)
  - 3.30 AGNO - Still continue
- **2025 – Present (Placement Ongoing)**
  - I previously lived abroad for several years while working remotely, and recently returned to Turkey to continue both my professional and I retok the national university exam and am now preparing to study in a field that matches my professional background in software engineering.

## Work Experience

**Kentkart / 2021.11.17 -**

**Team Leader / Backend Engineer**

*Kentkart is provide fare collection, vehicle tracking, passenger information, and mobile app solutions for transport authorities and operators.*

- I am working as a Team leader and Backend developer in the project about optimization of public transportation systems within Kentkart.
- **TechStack:** Node.JS/Express, MongoDB, PostgreSQL, MySQL, Redis

<https://kentkart.com/>

**Bisu / 2021 - 2021.11**

**Backend Engineer**

*With Bisu, you can shop for groceries or order water to your home.*

- I worked as a backend developer at Bisu. Here I provided new integrations to the backend architecture.
- **TechStack:** Node.JS/Express, MongoDB, MySQL, Redis

<https://bisu.com.tr>

**Gomeed / 2020.08 - 2020.11**

**Full Stack Developer**

*You can post your ads with Gomeed.*

- I worked as a full stack developer at Gomeed. I worked as a backend developer, but I also took part in project management.
- **TechStack:** Node.JS/Express, MongoDB, MySQL, Redis, React.JS, HTML, CSS

<https://gomeed.com>

**Kentkart / 2018 - 2020.08**

**Full Stack Developer**

*Kentkart is provide fare collection, vehicle tracking, passenger information, and mobile app solutions for transport authorities and operators.*

- As a backend developer in Kentkart, I developed new APIs.
- **TechStack:** Node.JS/Express, MongoDB, MySQL, Redis
